64887	02/09/2026	02/18/2026	AA Quarry John Rushly, Manager	Odor Fugitive Particulate Matter	Kingsville /Johnson	KCRO	MC	Email
Concerned Party: David Claspill Concern Info: Via email submitted on Sunday, February 8, 2026, at 9:32 a.m. On Jan. 26th and Feb. 5th the odor was bad enough you could smell it inside our home. The smell is coming from the quarry. The odor outside is one thing the odor inside our hose is unacceptable. The dust from the quarry is a problem also. This has to stop we should not have to smell this in our home. We need help. [sic] Conclusions: No strong odors or dust was observed during surveillance. Will continue to monitor area as concerns come in.								
64889	02/09/2026	02/18/2026	AA Quarry John Rushly, Manager	Odor	Kingsville /Johnson	KCRO	MC	Email
Concerned Party: Nelson (Nate) Christensen Concern Info: Via email submitted on Monday, February 9, 2026, at 3:36 p.m. Last night 2/8 and this morning 2/9 were bad. Have you had a conversation with yet? I just hate that they continue to get away with disturbing the neighborhood that was here first. [sic] Conclusions: No strong odors or dust was observed during surveillance. Will continue to monitor area as concerns come in.								
64900	02/10/2026	02/19/2026	Ed Ford (Landowner) and Josh Ford	Open Burning Scrap Tire Dump	Louisburg /Greene	SWRO	GE	Phone Conversation
Concerned Party: Robin and David Marlin Concern Info: Concerned Party stated that property owners are burning tires and then adding dirt on top to disguise the pile. CP stated that the burn pile was approximately 250 ft. long and that there were 80-100 tires being burned. CP also provided photos, which are included below. [sic] Conclusions: CON-1436 No further action required at this time.								
64901	02/11/2026	02/18/2026	Unknown	Other	Washburn /Barry	SWRO	JW	Other
Concerned Party: Veronica Cox Concern Info: Odor coming from fertilizer. Smell is coming from all directions around complainant's home. The smell is so strong that the complainant's dog does not want to go outside and is gagging when they come inside the house. [sic] Conclusions: CON-1448 Land application odors are exempt from odor regulations. No action is required.								
64903	02/11/2026	02/20/2026	Midwest Organic Solutions	Other	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: John F Hern Concern Info: This business is stinking up the area. I can smell it town at times and its 3 miles east of Jasper. I don't know what they are dumping out there, buts its nasty. Midwest Organic Sollutions, 11354 Thorn road, Jasper MO. Dylan Burns, Owner midwestorganicsolutions@gmail.com [sic] Conclusions: CON-1451 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors have been observed after multiple site investigations.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64904	02/11/2026	02/18/2026	Justin Fohn	Odor Agricultural Anhydrous Ammonia	Cassville /Barry	SWRO	JW	Other
Concerned Party: Jennifer J. Ivey Concern Info: The farm field across from my house has been spraying some pretty atrocious smelling liquid on their field it makes all of us sick we can't hardly go outside without getting a headache it makes my whole house stink everyone around here is miserable. My kids can't even play outside. I grew up next to chicken houses this is NOT regular chicken manure. This has been going on for like 3 summers and I'm sick of not being able to enjoy the outdoors or even sitting in my living room [sic] Conclusions: CON-1456 Land application is exempt from odor regulations. No action is required.								
64920	02/13/2026	02/20/2026	Jeff Mathis CEO, leased from Voltage a Kansas City Digital Agency	Odor Other	Kansas City /Jackson	KCRO	HM	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 7:01 am Friday, February 13, 2026. Date of Incident or First Noticed: 12/01/2025 First floor of business smells like leaking sewage gasses daily. The smell is extremely strong even after opening all doors and windows. It is super strong and employees are continually sick with upper and lower respiratory issues. I had pneumonia for roughly 2 months. [sic] Conclusions: 2/20/2026 This concern will be investigated by the city.								
64925	02/13/2026	02/17/2026	Synagro	Other Odor	Cleveland /Cass	KCRO	TC	Phone Conversation
Concerned Party: Aaron Seabaugh Concern Info: Via Webform email - Submitted at 10:45 am Friday, February 13, 2026 - Date of Incident or First Noticed: 11/02/2025 THERE HAS/HAVE BEEN PILES OF HUMAN WASTE ON THE TOP OF THE GROUND SINCE NOVEMBER. THE SMELL HAS BEEN HORRIBLE. FOR THE LAST 4 MONTHS, WE HAVE MULTIPLE NEIGHBORING PROPERTY OWNERS THAT ARE DEALING WITH THIS HORRIFIC SMELL AND WASTE ON OUR ROADS FOR MONTHS NOW!! [sic] Conclusions: No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission were observed.								
64926	02/13/2026	02/17/2026	Tony Cicerelli, President of Fire Protection District	Open Burning Open Dumps	Osage Beach /Camden	SWRO	BS	Letter RTC, UF
Concerned Party: Anonymous Concern Info: Leaf business has been dumping leaves into a ravine for several years. On Tuesday or Wednesday they burned pallets at the business. They pushed residue off into the ravine and caught the leaves on fire. Fire department had been unsuccessful at extinguishing the fire. Caller reports she had been told there may already be an investigator on the way. However, this is the first report to our office. [sic] Conclusions: CON-1476 No violations of 10 CSR 10-6.045 Open Burning Requirements was observed. Violation of Missouri Solid Waste Management Law and Regulations Section 260.210 RSMo was observed in regard to the unlawful dumping of vegetative waste into the valley.								
64933	02/13/2026	02/18/2026	AA Quarry	Odor Fugitive Particulate Matter	Kingsville /Johnson	KCRO	MC	Email
Concerned Party: Sandy Banks Concern Info: Via email submitted on Friday, February 13, 2026, at 7:39 a.m. The smell out here in Forest Ridge is awful this am. Good day to send someone out here Earle hole it smells like this. We are all complaining that they do this early am and on the weekends. Please let me know what you find out so I can inform the others. This has to stop. They know how to fix it and yet aren't complying to the rules. And the dust is bad also. [sic] Conclusions: No strong odors or dust was observed during surveillance. Will continue to monitor area as concerns come in.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64934	02/17/2026	02/17/2026	Como Premium Exteriors	Other	Callao /Macon	NERO	DB	Phone Conversation
Concerned Party: Robert G. Briant Concern Info: Online report states extensive concerns regarding indoor air quality following roofing work that closed a chimney and roofed over without capping it. [sic] Conclusions: Indoor air quality is not regulated by the Department. Called complainant to discuss. He said he was mostly wanting to turn the company in for leaving a chimney uncapped after demoing it down to below the roof.								
64935	02/11/2026	02/19/2026	Double O Organics	Odor	/Lawrence	SWRO	JW	Phone Conversation
Concerned Party: Parker Shoen Concern Info: The CP states that a property located at 1944 Lawrence 1100 (Double O Organics) is receiving and processing waste that is producing a foul odor. He stated that he has not experienced an odor this severe in the area before and is worried about volatile particulate matter that may exacerbate his pre-existing respiratory issues. The CP stated that he notices this odor on Monday evenings. He has recently purchased a property between the 2190 and 2180 block of Lawrence 1100 and has noticed the odor at this location (see GPS Coordinates below). The CP would like a call back with the results of the investigation. [sic] Conclusions: CON-1495 I did not observe any violations during this investigation. No action is required.								
64937	02/17/2026	02/19/2026	Ben Hornung	Open Burning	Crane /Stone	SWRO	JW	Phone Conversation
Concerned Party: Nola Bromley Concern Info: Nola Bromley called to report that the property owners of 504 Airport Rd (see ACE #61855) are burning regulated materials again. The department sent the property owner, Ben Hornung, a Continuing Non-Compliance letter on October 3, 2025, because he did not dispose of previously burned items that he claimed to have originated from the previous property owners. This CNC letter was sent to Hornung in part because he emailed the department on September 29 and stated that he would not clean up the pile because he did not feel responsible for it. Hornung stated that he would make "good faith efforts to gradually remove" the remaining materials, and it is unclear whether he is responsible for the recent burning that occurred on February 4, 2026. The caller stated that she observed a truck haul a trailer full of furniture and other renovation waste onto the property. The contents of the trailer were dumped onto the preexisting waste pile and burned. The caller has photographic evidence of this activity. [sic] Conclusions: CON-1499 I did not observe any violations during this investigation. No action is required.								
64942	02/17/2026	02/18/2026	Former Cornerstone Baptist Church	Asbestos Fugitive Particulate Matter	Lawson /Ray	KCRO	MC	Phone Conversation
Concerned Party: Andy Warner Concern Info: Caller reports that the old Baptist church at the corner of 3rd and Ingles in Lawson is being demolished. Demolition started yesterday and the building is completely down today (2/17/26) and they are hauling the debris off as quickly as possible. The demolition is causing dust everywhere, covering neighbors yards and cards. Caller is additionally concerned that no abatement of asbestos has been done on the building. [sic] Conclusions: Building was demolished without prior inspection for asbestos or notification. Contractor and owner advised to stop and inspect the debris. Both parties cited for failure to inspect and failure to notify. Parties are required to submit notification and properly handle any asbestos found during inspection. Refer to final report for further details.								
64951	02/11/2026	02/20/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Gideon Buchanan Concern Info: They are dumping waste on this property and it smells horrible. You can see the piles of it and you can smell it from miles away. It has to be leaking into our water tables. It is disgusting. You can smell it at homes for miles around this property and it's awful when you drive by also. We are honestly concerned about our well water being contaminated. Numerous community members have called and complained. [sic] Conclusions: CON-1463 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors have been observed after multiple site investigations.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64952	02/17/2026	02/20/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Shawna Farmer Concern Info: OA concern states as follows: "Location is at Midwest Organic Solutions at 11354 Thorn Rd, Jasper, MO 64755. We live 0.3 tenths of a mile from them at 11705 thorn road jasper mo 64755. Our concern is the smell it is so overwhelming and we get sick to our stomach we puke. This has been happening for a while and it can to our knowledge that they are dumping human waste and grease on top of the soil." [sic] Conclusions: CON-1505 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors have been observed after multiple site investigations.								
64956	02/17/2026	02/24/2026	David Krebs	Permitting Fugitive Particulate Matter	Reeds Spring /Stone	SWRO	TB	Communication In Person TODS, UF
Concerned Party: Anonymous Concern Info: OA concern states as follows: "As a recent employee, I noticed this place has been operating without necessary air permits for the last 4 years. This is a ready mix operation in reeds spring mo. They also wash out the leftover concrete out back and there's several streams that intertwine with the property. [sic] Conclusions: CON-1507 Operating without a permit Placing/causing water contaminates.								
64957	02/17/2026	02/24/2026	David Krebs	Permitting Fugitive Particulate Matter	Reeds Spring /Stone	SWRO	BD	Letter UF
Concerned Party: Anonymous Concern Info: OA concern states as follows: "This facility has been actively operating for the last 4 years without an Air Pollution Permit, and water permit. They Constantly wash the leftover concrete down on the farm lot, letting the material seep into the ground. The driveway is always dusty. The Concrete Batch Plant puts off TONS of emissions and Silica Dust which is harmful to the community. [sic] Conclusions: CON-1506 An Unsatisfactory Finding will be issued for failure to obtain a construction permit for the ready mix concrete plant in accordance with 10 CSR 10-6.060 Construction Permits Required.								
64958	02/17/2026	02/18/2026	Ron Hayes	Asbestos	Mount Vernon /Lawrence	SWRO	JW	Site Visit
Concerned Party: Anonymous Concern Info: Caller states that contractors are renovating asbestos out of a former hospital and recovery center located at 600 N Main St, Mt Vernon, MO 65712. The property has been closed for some time but may still be owned by Cox Health. The caller states that multiple trucks were parked on the property at the time of concern. [sic] Conclusions: CON-1511 I did not observe any violations during this investigation. No action is required.								
64960	02/17/2026	02/24/2026	Justin Gorman	Scrap Tire Dump	Exeter /Barry	SWRO	GE	Communication In Person
Concerned Party: Anonymous Concern Info: OA concern states as follows: "Large amount of tires and trash being dumped on property, dead livestock." [sic] Conclusions: CON-1525 No solid waste or scrap tire violations noted at the time of the investigation.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64961	02/17/2026	02/24/2026	Lake Meadows RV Park	Open Burning Hazardous Air Pollutant Release Stormwater Contamination	Bolivar /Polk	SWRO	BS	Letter TODS
Concerned Party: Anonymous Concern Info: OA concern states as follows: "Open burning of multiple Hazardous materials. That leads to water source to a stocked pond . Burning beds chemicals and more now they adding more furniture to burn again .you can see by north dumpster all they opened burned few weeks ago plus near 13 hwy. They leave pile burning leave it or just stand there and burn each section add wood to it.. the last burn of chemicals and beds still on ground . Now adding more to burn couches again vinyl siding and more . They even burned insulation paint cans other chemicals." [sic] Conclusions: CON-1510 Improper disposal of durable goods and demolition waste through burning was in violation of 10 CSR 10-6.045 Open Burning Requirements and Missouri Solid Wate Law and Regulations Section 260.210 RSMo. A letter of unsatisfactory finds was issued with response required in acknowledgement of the regulations and proof of disposal. Please refer to CON-1556.								
64962	02/11/2026	02/19/2026	Carl Bunch	Open Dumps General Water Quality	Conway /Dallas	SWRO	MK	Site Visit NOV, RTC
Concerned Party: Anonymous Concern Info: My maps show the location as 37°30'08.1"N 92°57'18.7"W - on the west side of jones Creek Rd, charity mo. , they have cleared a patch of trees all the way down to the bank using equipment similar to a skid steer and continually pile and push trash off into the creek [sic] Conclusions: CON-1459 I will discuss with the details of the investigation with Carl Bunch once contact is made. I will inform him that he has 30 days to clean up the trash and properly dispose of it at a landfill or transfer station and provide receipts. A Notice of Violation will be issued illegal disposal of solid waste and open burning. SEE NOV FOR DETAILS AND PHOTOS April 6, 2026, Area has been cleaned and addressed. All required actions of the NOV have been met.								
64963	02/18/2026	02/18/2026	C & L Grease and Wastewater	Odor	Carterville /Jasper	SWRO	JW	Site Visit
Concerned Party: Anonymous Concern Info: New Report an Environmental Concern 74461 Environmental Concern 2/18/26: Carterville, MO & Webb City, MO have experienced a TERRIBLE smell in the air during early morning hours and evening hours. There has been talk in the town that it's coming from a wastewater company. It can't be legal because the smell is so foul. It's affecting where people want to move and buy property. Please help. It's so bad. [sic] Conclusions: CON-1528 I did not observe any violations during this investigation. No action is required.								
64964	02/17/2026	02/23/2026	Megan Allen	Open Burning	Alba /Jasper	SWRO	BD	Site Visit
Concerned Party: Anonymous Concern Info: OA concern states as follows: "There is a fire burning nearly every day near our home, and we are being polluted regularly by a neighbor who is intentionally trying to aggravate us. My wife has Chronic Kidney Disease and is losing kidney function rapidly since this neighbor has started burning and polluting the environment. We believe she burns underground as well." The concern also listed September 20, 2025 as the date the incident was first noticed. [sic] Conclusions: CON-1508 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64965	02/18/2026	02/18/2026	Larry Ward	Odor	Carterville /Jasper	SWRO	JW	Site Visit
Concerned Party: Ryan McCoy Concern Info: From webform: New Report an Environmental Concern 74456 Environmental Concern 2/18/26 C&L Grease just outside of Carterville continues to dump large quantities of waste material onto the ground. After receiving a citation from the DNR they appeared to scale back the waste disposal onsite but it appears they have been increasing the amount of material being disposed of on the ground because the strong sewage odor has again been regularly present. It can be smelled from several miles away depending on the wind direction. Is there a mechanism for revoking their permit or not renewing it once it expires? MOG822251. This permit has been a significant problem for thousands of people in the Carterville and Webb City area. Our employees are again complaining about the terrible air quality present at our business location because of C&L Grease. [sic] Conclusions: CON-1527 I did not observe any violations during this investigation. No action is required.								
64966	02/18/2026	02/20/2026	Justin and Lindsey Woods	Open Burning Open Dumps Chemicals in Water	Lathrop /Clinton	KCRO	CK	Communication In Person
Concerned Party: Mike Newhouse Concern Info: Email via EPA Webform: Too many animals, polluting neighbor's property Neighbor burning trash and chemicals from burn pile are getting to informant's pond. Violator also pumped his septic into the informant's pond. He is burning many piles of trash from jobsites that he brings back to his house and the residue washes into informant's pond. The pond no longer sustains life. It is very polluted now. All the fish are dead, and nothing will grow there, even cattails. He throws manure over the fence onto informant's property. Manure and human waste are polluting his pond. Informant has photos and documents to prove it. This has been going on for 7 years. The local government will not do anything because of a zoning office mistake made during the sale that the real estate agent messed up. They have horses and cows on less than 5 acres. Violator has buried dead animals on his property, right on the property lines. He buries dead animals and trash in the corners of the property. The violator also had a large pile of lumber from the stockyards that he dumped on his land. A few years back informant called the EPA, and someone came out but ended up looking at lumber with lead paint on it and didn't do anything. The zoning office is showing favoritism toward the violators because they are only supposed to have 1 horse per 5 acres and zoning allowed them to have 7 horses, 5 cows and a goat. The whole property is a muddy mess now. They went to court on March 25th of this year. The zoning office went to court as witness for the defendants and the judge told them to get out. [sic] Conclusions: Justin Woods will be sent a compliance assistance letter that focuses on the burning of untreated wood trade waste so he understands he is not allowed to burn any trade waste on his five-acre property located at 6301 Northeast 272nd Street, Lathrop.								
64985	02/19/2026	02/20/2026	Unknown	Stormwater Contamination Open Burning	Independence /Jackson	KCRO	TC	Referred to Other Agency
Concerned Party: Tammy Drummond Concern Info: The concern party stated that the responsible party appears to own a plumbing or AC company and they stack up AC units and other units on the property and they believe something is draining into the creek. The concern party said that they have been seeing several dead squirrels and racoons in the area and believe it is linked to them drinking the water. There may also be some open burning taking place as well. [sic] Conclusions: The environmental concern was referred to the Independence Municipal Services Department Office of Environmental Compliance. Josh Eis stated he will also refer the environmental concern to the Code Enforcement Group.								
64986	02/19/2026	02/19/2026	Chad Fry	Open Burning	Grain Valley /Jackson	KCRO	JS	Other
Concerned Party: Anonymous Concern Info: The concern party stated that this property has a lot of large trucks coming and going through the day and they are burning something that causes black smoke. The burn location appears to be behind the small shed on the property. [sic] Conclusions: No one was available on site during the investigation. A subsequent interview found that the property owner had previously burned untreated wood, brush, and a small amount of other materials from his business on this property. Information was provided on the open burning regulations, and the owner immediately agreed to stop burning. A compliance assistance letter will be sent to the property owner, Chad Fry, as follow up.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64988	02/17/2026	02/18/2026	Former Cornerstone Baptist Church	Asbestos	Lawson /Ray	KCRO	MC	Email
Concerned Party: Kristie McAdams Concern Info: I live in a residential area that just had an old church demolished today. I was previously told by a city member that the church could not be used as a community center because it was full of asbestos and the cost to have it professionally gutted would be too mitch for their budget so eggy sold it. Now that it has been demolished how do we know if the asbestos was handled correctly? I live just a block away, today was windy and want to make sure myself, my yard/garden, and pets are not at risk. The church was off 3rd St, Lawson, MO 64062. It's my understanding they had to get an inspection prior to and after removal. Any information you can provide is greatly appreciated. [sic] Conclusions: Building was demolished without prior inspection for asbestos or notification. Contractor and owner advised to stop and inspect the the debris. Both parties cited for failure to inspect and failure to notify. Parties are required to submit notification and properly handle any asbestos found during inspection. Refer to final report for further details.								
64989	02/18/2026	02/18/2026	Unknown	Open Burning	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party: Kristina Maciel Concern Info: I am actually calling on my neighbors. They are constantly bringing trash to the neighborhood and also several people are always bringing him copper to burn I imagine allegedly for drugs. Seeming I see them smoke meth in Front of my house. Yesterday I woke up to a smell and sure enough it was the neighbors outside at 1 in the morning burning copper and plastic. I am a severe asthmatic. This time has seriously caused me problems. I report the fires to the fire department they usually put it out before they get there because they hear the sirens. They have put out the fires several times just for them to start them back up when they see our lights turn out to go to bed. I have called 311 I have called the police and fire department and no help what so ever. [sic] Conclusions: This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.								
65003	02/19/2026	02/20/2026	Columbia MO Rentals	Asbestos	Columbia /Boone	NERO	DB	Phone Conversation
Concerned Party: Samantha Martin Concern Info: Demolition of single-family residence mobile home back in September. Complainant is concerned about lingering asbestos and mold spores in the soil and air after the lot was leveled. [sic] Conclusions: One structure SFR demolition not regulated by DNR. Left message for complainant with info.								
65005	02/19/2026	02/20/2026	Courtney Ridge Landfill, LLC	Fugitive Particulate Matter	Sugar Creek /Jackson	KCRO	CK	Phone Conversation
Concerned Party: Steve Carey or 660-238-8109 Concern Info: CP reports the Courtney Ridge Landfill is very dusty today, and has been having issues with dust for a while. CP normally calls Jason Summers at the landfill directly but his number is no longer working. CP says he believes the dust is generated at the end of the day when they are putting cover on the trash. It usually happens between 3 and 5 pm. If there's been rain or there isn't much wind, it's fine, but when it has been dry and windy like currently then it is very bad. I called Josh Smith at Courtney Ridge Landfill who confirmed that Jason Summers is no longer working there. The new manager contact is Andrew Kelne, which I passed on to the CP. [sic] Conclusions: At the time of the site visit, there was no dust leaving the property boundary. The concerned party was contacted by the landfill's operations manager, Andrew Kelne, and was satisfied with the facility's response.								
65012	02/18/2026	02/13/2026	Joey Ramsey	Open Burning	Neosho /Newton	SWRO	JW	Other
Concerned Party: Emily Bailey Concern Info: Burning household trash on a daily basis. Smells of burning plastic [sic] Conclusions: CON-1548 I did not observe any violations during this investigation. No action is required.

65013	02/18/2026	02/20/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Alyssa Olhausen Concern Info: I live in the part of town in Jasper that hasn't noticed the smell much, but as of today 2-16-26, the smell is absolutely HORRID. I cannot open my windows to my house to let fresh air in and it is absolutely disappointing. I puked when I smelled it first thing this morning. This needs to be taken care of. [sic] Conclusions: CON-1550 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors have been observed after multiple site investigations.								
65014	02/18/2026	02/20/2026	Midwest Organic Solutions	Odor	/Jasper	SWRO	BD	Phone Conversation
Concerned Party: Matthew Newman Concern Info: Concerned party was calling for an update on the status of the water pollution permit and to report concerns related to stormwater runoff. I indicated I would pass those along to our water pollution section. He was also calling to say that the odors were bad in the City of Jasper when the winds are out of the east and they were bad at his house a mile north of the facility when the winds are out of the south. I let him know that we had been and will continue to monitor the area for odor concerns, however unless the odors reach a 7:1 threshold, there are no violations. He said that he has been reading up on Nasal Rangers and said that it is almost impossible to get a reading above 2:1. [sic] Conclusions: CON-1554 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors have been observed after multiple site investigations.								
65015	02/18/2026	03/09/2026	James Holloway Family	Residential Waste Disposal	Forsyth /Taney	SWRO	GE	Phone Conversation
Concerned Party: Anonymous Concern Info: Trash hauler is bringing trash back to his property and burning it. Several people are living on the property, so not sure which one is the actual hauler. There is a commercial trash truck located on the property. [sic] Conclusions: CON-1555 Educational packet left on-site. No solid waste or open burning violations noted at the time of the investigation.								
65019	02/19/2026	02/24/2026	Unknown	Hazardous Air Pollutant Release Odor	/Taney	SWRO	BD	Other
Concerned Party: Darren Matthiesen Concern Info: Concerned party called stating that somewhere around his property there is something burning only in the evening. The smell of burning plastic and gasoline are overwhelming. His neighbor came over recently and asked if he know what was going on. So, he did call the fire department and they came out, (they could smell it as well). They drove around for a couple hours and never found flames or visually saw a fire. They told property owner that they may have a smoldering fire in a pit type area and that is why they couldn't see anything. This has been going on for three months now. Not everyday but several times a week. [sic] Conclusions: CON-1564 The source of burning/odor could not be identified during the investigation. The concerned party is going to continue to monitor the odors and provide more information when available. No further action is required.

65020	02/19/2026	02/24/2026	David Azevedo	Odor Open Burning	Dunnegan /Polk	SWRO	BS	Site Visit
Concerned Party: Anonymous Concern Info: Anonymous person called and stated that a neighbor has a couple grease trucks and collects yellow grease from different restaurants. Concerned party stated that he steals this grease. When he brings it home he burns it at night with a 100 gallon propane tank to get the water out of it. The odor is horrible and his wife has asthma. Also, with the No Burn warnings out this week he is still burning this grease. The owner has 2 grease trucks. He did state that this has been going on a couple years and getting worse. [sic] Conclusions: CON-1566 A copy of PUB2047 Open Burning Fact Sheet was provided at the address with the correct source of concern. A business card with contact information was left at the entrance to the property.								
65021	02/19/2026	02/20/2026	Midwest Organic Solutions	Hazardous Air Pollutant Release Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Anonymous Concern Info: WEB CONCERN - 8:30 p.m. while driving by property an overwhelming putrid odor that caused shortness of breath and coughing to my children. [sic] Conclusions: CON-1572 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors have been observed after multiple site investigations.								
65023	02/19/2026	02/25/2026	Capital Materials, Paving and Construction	Particulates Hazardous Air Pollutant Release	Ozark /Christian	SWRO	BD	Phone Conversation
Concerned Party: Angela Dye Concern Info: Concerned party called and stated that the Capital Quarry or Capital Materials Paving and Construction is causing low visibility today due to dust, particulate matter coming off of the quarry area. She stated it is hard to breath and be out in it. She would like a call back once the investigation is over. She also stated the main drive into the quarry is in Christian county and part of the quarry may be in Greene as well. She also indicated she would take a couple photos and send them to the me as well. [sic] Conclusions: CON-1579 No violations of 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin were observed during the site investigation. The dust concern was reported on a day that produced 40-50 mph gusts of wind, and no evidence of material build-up was observed on adjacent property boundaries. No further action is required.								
65025	02/20/2026	02/20/2026	H & L Auction	Residential Waste Disposal Open Burning	/Polk	SWRO	JG	Referred to Other Agency
Concerned Party: Paul Ashley Tester Concern Info: Email Concern (attached) "I am writing to formally report an ongoing, willful violation of the Missouri Clean Water Law (RSMo 644) that has persisted for 18 years and recently resulted in the death of my dog from an E. coli infection. My neighbor's property in Polk County currently houses three campers, a mobile home, and an auction house business (serving 50+ people bi-weekly), all of which discharge raw sewage and greywater into an illegal French drain that empties into a surface ditch flowing toward my well. I have documented surfacing effluent—including cattails thriving in the discharge ditch and contaminated puddles on gray clay soil—and my water well has tested positive for Total Coliform. Because this involves a commercial business and multiple residential units that likely exceed the 3,000-gallon-per-day threshold, I am formally requesting a referral to the Missouri Environmental Crimes Task Force and a state-led Dye Trace to protect my livestock and public health." Attached are some photos that I have. But there is quite a few Google Earth pictures that show a continuing violation that I have acquired. They are available upon request. [sic] Conclusions: CON-1589 This falls to the Polk County Health Department.

65029	02/20/2026	02/24/2026	John Schmitz	Underground Storage Tanks Asbestos	Sparta /Christian	SWRO	WH	Email
Concerned Party: Anonymous Concern Info: Incident Description: EPA POSSIBLE VIOLATION 7261 state hwy 14 sparta, mo (address May not be exact) Buyers name John Schmitz. I just want someone to check to see if there are guidelines for this property that should have been followed before starting any new business. The business in question has an old car wash on property and a service/gas station that has been closed many years. In the 70's when the service station was open, a lot of oil was poured in different locations around the building. No clean up has ever taken place. The property in question is between" Hodges Insurance" and a new business "Little Creek Homestead" They are moving on with renovations and we have seen no inspections or changes in the landscape. Appears they are spreading white gravel possibly over the existing soil and concrete. Please check this out and see if any violations have taken place. We live in a small town so I prefer to remain anonymous. If there were no guidelines to purchase this location I think it would have sold quickly. This property has been for sale for many, many years--just sitting vacant. I just feel it isn't right for some people to think they do not have to follow the guidelines Sincerely [sic] Conclusions: CON-1600 I observed no spilled oil, fuel, or chemical. The owner of the site will be held to proper requirements for clean-up if contamination is discovered in the future as a result of excavations at the site. John Schmitz understands that a couple of utility projects have been conducted at the site prior to his ownership and to his knowledge no contamination was found during these projects. Asbestos requirements were discussed with Schmitz and additional information provided in an email to Schmitz on March 11, 2026.								
65035	02/17/2026	02/19/2026	Perkins Restaurant	Odor	Independence /Jackson	KCRO	DE	Referred to Other Agency
Concerned Party: Margaret Padgitt Concern Info: I visited Perkins 6 months and noted a strong smell of sewer gas in the women's restroom. I reported this to the manager at the time. I visited again on February 9 and the smell was much worse. It is so bad it made me nauseous, and other women refused to go into the restroom. This is potential health problem. [sic] Conclusions: The issue has been resolved.								
65041	02/11/2026	02/19/2026	Brandon May	Open Dumps Open Burning	Centralia /Boone	NERO	BH	Letter AC
Concerned Party: Kim Burrell Concern Info: On February 11, 2026, the Northeast Regional Office received a concern stating that Brandon May, who owns the property north of 17440 Barnes Road, near Centralia, has a burn pile approximately 10 feet by 12 feet in size. Reportedly, the pile primarily consists of brush, but has regulated waste consisting of demolition waste and an old sectional in it. The concerned party stated that the demolition waste appears to be part of an old deck. The caller stated that Brandon May attempted to burn the waste on February 7th, but was unable to get the pile to burn. The caller is concerned because the burn pile is approximately 30 yards north of their stables. [sic] Conclusions: Minor violations of the Missouri Solid Waste Management Law and Regulations were determined. At the time of the investigation, Brandon May had dumped a small quantity of treated lumber and plywood in a brush pile for disposal. On February 27, 2026, Brandon May submitted a sufficient response showing that the lumber and plywood had been removed and properly disposed of. An information letter will be mailed to Brandon May, discussing the Missouri Solid Waste Management Law and waste management practices. No further response required.

65052	02/20/2026	02/24/2026	Mark Merritt	Fugitive Particulate Matter	Lamar /Barton	SWRO	JW	Site Visit
Concerned Party: Sean Stewart Concern Info: From EPA concern entry: Incident Description: This company does some sort of processing of material to separate out precious metals. They have large piles at this location, and one additional in city limits off Hwy 160, where dust blows all over in the wind. I do not know what this material is or where it comes from although i believe it is ground up demo-ed buildings. I have concern about the toxicity of the dust, a farmer in the nearby area has had livestock die to cancer since this facility began operating. Alleged Violator's Latitude / Longitude: 37.482004 / -94.272435 Alleged Violator's FRS ID: 110071884360 [sic] Conclusions: CON-1610 I did not observe any violations during this investigation. No action is required.								
65053	02/23/2026	02/25/2026	APAC-Kansas, Inc. - Harrisonville Quarry	Other	Harrisonville /Cass	KCRO	MC	Referred to Other Agency
Concerned Party: Patsy McFerrin Concern Info: Concerned party is upset with the deep blasting that is occurring at Apac stating that it is damaging their home (causing cracks). They live roughly 2 miles away from the quarry. States they are blasting roughly once a week. They are unsure if dust is leaving the property but feels that it probably is. [sic] Conclusions: Concern is related to blasting strength, which is regulated by the Missouri Department of Public Safety, Division of Fire Safety. Referred to Division of Fire Safety for appropriate follow-up.								
65057	02/23/2026	02/26/2026	Warren Hills Elementary School	Other	Liberty /Jackson	KCRO	MC	Email
Concerned Party: Stewart Simonson Concern Info: Outdoor and Indoor Air Quality tests were performed by an IAQA Professional from Children's Mercy Hospital, Kansas Environmental Health Program at the school on Friday, January 26 2024 and made publicly available at https://wh.ips53.org/health-and-environmental-updates. Testing was performed due to air quality complaints by students as well as concerns about 6-10 teachers who have recently developed cancers. Measurements showed 1. Two outdoor NO2 measurements over 7 hours averaged 1.85 ppm/1,850 ppb, and exceed the EPA 1-hour standard (100 ppb) by~1,750%. 2. Mean Indoor NO2 measurements (~0.2 ppm/200 ppb) exceeded EPA, WHO, Health Canada and CDC/ATSDR health-based thresholds by up to 1427%. 3. Measurements were taken at unusually high air change rates (~31842 ACH), which would normally dilute contaminants. 4. Indoor CO levels (~1.8 ppm) remained ~18 higher than out door levels 0.1) despite high ACH. 5. Combined NO2 and CO findings strongly suggest combustion exhaust intrusion from an unidentified source outdoors. Health concerns about the school have been expressed by Congressman Sam Graves in a May 2025 letter asking the federal government to get involved. https://graves.house.gov/sites/evo-subsites/graves.house.gov/file/evo-media-document/graves-warren-hills-letter.pdf Primary concerns are combustion exhaust intrusion into the school by approximately 23 roof top natural gas heaters and combustion exhaust re-entrainment into building make-up air due to restricted air flow from architectural screens-Three or more school entryways are surrounded by up to 30-40 busses and vehicles during drop off in front of covered entryways that can trap gasses. Despite NO2 test values exceeding standards and limits of all of the public health agencies, the school board, and the Missouri Health Board, after review have chosen to do nothing. I recommend additional testing per EPA guidelines to determine the source of combustion air entering the building. [sic] Conclusions: The concern does not appear to be regulated by the department. Recommended consulting with State and local health departments and/or an industrial hygienist to determine appropriate actions.								
65063	02/24/2026	02/24/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Jared Jeffries Concern Info: From Website concern form: "There is a new business that is emitting an absolutely terrible odor about 1.5 miles east of Jasper, MO. There are smoldering piles of something that smells like rotting piles of dead animals. The smell is absolutely disgusting when I drive by twice every day. If the wind is right, I smell it at my house almost 4 miles away and it still smells awful. Something needs to be investigated, the smell is absolutely disgusting and makes it hard to be outside. [sic] Conclusions: CON-1628 No odors were observed leaving the facility after the site investigation on 2/23/2026.

Concerned Party: Jill McQuay Concern Info: cp states: chem trails being sprayed hard non-stop continuously - the residents are all concerned as it's been going on for quite some time and would like for someone to look into this to make sure its being done properly. [sic] Conclusions: We spoke via telephone, Jill expressed her concerns over extreme weather in the region. I explained contrails and provided a factsheet via email. I provided contact information for both Environmental Protection Agency (EPA) Region 7 and Federal Aviation Administration (FAA). Jill stated she did plan to make contact with both.								
65079	02/24/2026	02/25/2026	Land Bank of Kansas City	Open Dumps Open Burning	Kansas City /Jackson	KCRO	DS	Communication In Person
Concerned Party: Carla Barnard Concern Info: Via Webform email - Submitted at 11:51 am Tuesday, February 24, 2026 - Date of Incident or First Noticed: 1/14/2026 A homeless encampment has popped up there. There are 4-8 people staying there. More at other times. They are dragging trash and garbage bag there and leaving trash all over. They have dragged metal, plastic and ever grocery cart over there (6) at last count. The make fires and burn smells like plastic, wire, and chemicals cone from there. They have 3 Pitbull mix dogs that are running around without leashes or tags. We use to see deer, up to 10 running through the woods. But now are nowhere around. We use to hear barred owls, but have heard nothing from them. We have not seen any of the cranes or geese that would hang out in the creek in from of this camp, but have not seen or heard them. They have cut down trees and cleared an area. They have turned it into a bare dirt area. [sic] Conclusions: Called concern party and let them know it is in the 311 system. Gave the phone number for Land Bank of Kansas City.

65124	02/18/2026	02/20/2026	Plumino (previously Biokyowa)	Other	Scott City /Scott	SERO	BG	
Concerned Party: Anonymous Concern Info: CP States: There is a terrible odor in Southern Cape Girardeau county near Pioneer Trailer Park. CP Mother can also smell it in Scott City. They believe the odor is coming from BioKyowa near Scott City. For the last week it has been overwhelming, hard to breath even inside the house. Cannot get odor out of the house and it's all over outside as well. Previously the odor issue from BioKyowa was only occasional and for a day or less, now they smell it everyday. It even burns inside the CP mouth and nose when breathing it. [sic] Conclusions: On February 20, 2026, Lyndsey Rightnowar, Environmental Specialist, and I conducted an odor monitoring investigation. We monitored locations in Scott City and the Pioneer Mobile Home Park. No odors were dectected in Scott City. At the Pioneer Mobile Home park, we could detect an odor on pine or cedar, likely from the cedar and pine trees nearby. We also made contact with the facility. Upon arrival, no odors were noted on site. We spoke with Emily Graves, Facility Compliance Coordinator and Chad Schuster, Environmental Superintendent about the operations of the facility. No malfunctions or issues had occurred to create an odor. The wastewater treatment system had not deemed an odor treatment necessary.								
65125	02/19/2026	02/20/2026	Ervin "Bud" Collins	Other	Delta /Cape Girardeau	SERO	BG	Referred to Other Agency
Concerned Party: Anonymous Concern Info: Received by email. CP States: The night time burning of oil, rubber, plastic, and the insulation off electrical wire at Buds air compressor in delta. He's burning at night to avoid being seen during the day. He's burning from a stove inside the building. Smoke is very thick and making it hard to breathe. Some is seen and smelt all the way to chaffee. [sic] Conclusions: On February 20, 2026, I conducted a drive by of the air compressor station owned by Bud Collins. I did not see any evidence of burning at the time of the drive by. On February 27, 2026, I referred the concern to Mary Jo Barlow, the Mayor of the City of Delta.

Concerned Party: Anonymous Concern Info: Received via email CP states: Someone has been dumping a bright orange chemical powder next to Tower East of SEMO Campus. It reeks of ammonia, and is just sitting on the ground. [sic] Conclusions: Hannah Goetz and I investigated the concern on February 25, 2026, when we were on campus for the MS4 Audit. We were accompanied by Autumn Gentry and Sylvia Forester of the SEMO MS4 Program. It appeared that the “bright orange chemical powder” referenced in the concern was pet bedding shavings. It did have a slight ammonia smell - similar to animal urine. It was also noted that there were shavings in the adjacent trashcan. Autumn stated she would submit a work order and have it cleaned up the next day. When Hannah returned on February 26, 2026, to complete the MS4 Audit, it was discussed at that time that they investigated the concern further and confirmed that it was actually a combination of used cooking oil and vomit absorbent powder. The powder and oil have been cleaned up. The concern was referred to the SEMO MS4 Coordinator, Autumn Gentry, and appropriately cleaned up. No further action necessary at this time.

65145	03/02/2026	03/03/2026	unknown	Particulates	/Jasper	SWRO	BD	Memo
Concerned Party: Anonymous Concern Info: New Report an Environmental Concern 75251 Environmental Concern 3/2/26: The values on my air quality monitor at my location today are extreme. The AirNow map shows mild elevation (yellow) for the area, but my monitor recorded a significant rise at 2 a.m., peaking at nearly 400 by 4 a.m., then dropping back down at 6 a.m. The high recorded was 486 at 2:56 a.m. I had activities and errands, and thinking this was back to a normal low for the day, didn't check again until 5 p.m. At 8:23 a.m., my monitor logged a new high of 502, along with a low of 0 at 12:22 a.m. 10 or less is a normal good day, but now it is not unusual for AQI values of 50 – 100 to persist for long period in the day, and occasionally there are higher values. This is the first time I have seen a value this high, and I am concerned for myself and neighbors whether there are immediate health risk and what the source is. At 7 a.m., there was a surge again to around 200 by 9, then another surge up to nearly 400 by 10 that persisted through 11 a.m., then dropped a little. Between noon and 1 p.m., the values stayed in the low 200s, then rose again between 2 and 4 p.m. The values are currently: Current AQI - 256 1-hr AQI – 254 PM1 – 177 PM2.5 – 181 PM10 - 182 There was a brief rain earlier today and there was an odor of smoke from a fire being put out by the rain. But it isn't unusual for burning to occur in this area, and values have not been this high for times when brush or leaves are being burned. We used a slicer/seeder in the yard on the west side of the house before the rain, but that didn't produce noticeable dust and the south wind would have moved any dust north rather than east. The values persisted long after we had stopped using the tool and long after the rain had stopped. Also, the increase began long before we began using this tool. We are in the path of air movement from Joplin, and there are a number of discharging facilities there. Some of the permitted facilities that are closest to us along this path are EBV Explosives, Dyno Nobel. There are also quarries in this vicinity, but those tend to produce more PM10 and the air movement usually passes to the west since the facilities are primarily not south of us. Most of the PM today is smaller than PM1.0 [sic] Conclusions: CON-1727 See email attachment for CON-1720 for additional details regarding the investigation. No further action is required.								
65146	02/23/2026	02/23/2026	Carthage Crushed Limestone TelSmith Plant	Fugitive Particulate Matter	Carthage /Jasper	SWRO	BD	Letter RTC, UF

65149	02/26/2026	02/26/2026	Unknown	Odor	/Jackson	KCRO	MC	Email
Concerned Party: Morgan Scott Concern Info: Experienced Odor Date and Time: Feb 26, 2026 6:10 am Experienced Odor Duration: Currently experiencing the odor Experienced Odor Description: Burning chemical smell Experienced Odor Intensity: Strong or Offensive Experienced Odor Address and/or Location Description: 1503 South Logan Avenue Independence Missouri 64055 Potential Source: Additional Information: Started this morning again 2/26/26 -- I have smelt this before the other year only once originally, a burning chemically smell so strong It comes into my house and I have to cover my face because it causes discomfort and headaches. I can even smell it on my dog after letting him out for a few minutes, but it has now happened like 3 or 4 times within the last 2 months. I can't find anything on this anywhere of what in the world this is [sic] Conclusions: Local fire department unaware of any issues. No source or odors found. Concerned party advised to update department with any new information.								
65152	02/17/2026		Residential	Open Burning	St. Louis /St. Louis City	SLRO	JC	Letter
Concerned Party: Anonymous Concern Info: We received an anonymous open burning concern from the EPA. The CP states: Violation of Stl ordinance excessive smoke open burning smoke getting into house on other street travel and excessive smoke is violation of Stl ordinance may be violation of clear air act please endure second consecutive day. Fire hazard for dense Benton Park avenue [sic] Conclusions: No violations were observed during my site visit.								
65153	02/18/2026	02/23/2026	Commercial Business	Open Burning	High Ridge /Jefferson	SLRO	CW	
Concerned Party: Anonymous Concern Info: We received an open burning concern from the DNR Website. The CP states: I am reporting repeated open burning at a property operating a construction business in a residential neighborhood. The burning has been occurring intermittently for over one year. The materials being burned appear to include construction debris and/or trash. The smoke is often thick with a strong chemical or plastic odor. When I briefly stepped outside this evening, I developed a headache and felt physically unwell after exposure to the smoke. The odor is strong enough that I cannot comfortably be outside on my own property when burning is occurring. I am concerned that prohibited materials such as plastics, or other construction waste may be being burned. This activity is affecting my ability to use and enjoy my property, including gardening outdoors. The burn area appears to be located on the business property lot next to my home. Smoke travels uphill toward my residence. This has been an ongoing issue, not a one time occurrence, and I am worried about what I'm often breathing in. Please keep me anonymous for my safety, as I've been harassed and followed by some of these individuals. [sic] Conclusions: No evidence of an open burning event was noted. I left an Open Burning fact sheet, a letter, and a business card in the mailbox for 3026 Carol Ln.

65154	02/17/2026	02/23/2026	Residential	Open Burning	Warrenton /Warren	SLRO	PT	
Concerned Party: Michael Neill Concern Info: We received an open burning concern through an email from a previous concerned party. The CP states: Hi Kaleigh, The burning died down a bit for a while, but it has started up again. Today, they burned huge piles of plastic waste in the same area that you investigated last year. I spoke with the Fire Marshall in Warrenton, and he told me he would love to help but this type of thing is under the jurisdiction of the department of natural resources. The address where the burning is occurring is 31400 Mariah lane. Again, large amounts of plastic waste...some appear to be industrial in nature as well as relatively large piles of household trash. It is illegal in Missouri to burn plastic waste, among other things. I request that someone come back to the property and investigate, and please take whatever steps are necessary to get this to stop. An additional email was send with pictures and it stated: I sent a previous email this morning. The burning of large amounts of plastic waste continued for approximately 4 hours. After that, someone in the home went out and deposited another load of plastic waste, this time likey from the home. This time I went over to the line of our property and took pictures. You will probably need to zoom in, but you will see a large pile of ashes and plastic waste on top of the ashes. The pictures don't quite do it justice, as the amount of waste when seen in person is uncommonly large. If someone would please give me a call I would appreciate it. I don't feel it is safe for me or my family to go outside considering the toxic smoke and who knows what is left in the ashes that blow around all day. In my opinion, this is over the top for one family. This has been going on for 8 years, and apparently the letter you sent them in June didn't do much to slow them down. I hope this time you will consider a much more direct and harsher approach. [sic] Conclusions: We did not observe evidence of open burning at the time of the investigation, and I will be mailing an Open Burning Facts Sheet to the source address via certified mail.								
65155	02/17/2026		Daniel Hager/Hager Tree Care	Open Burning	Wellsville /Montgomery	SLRO	MC	
Concerned Party: Anonymous Concern Info: We received an anonymous open burning concern from the DNR Website. The CP states: My neighbors at 78 Sommer Road seem to be using there property as a dump and burn site. He runs Hager tree Care and on several occasions he has brought home trees and debris and piles up and burns them. Recently he has started bringing in other items from outside jobs and piling i am sure to get ready to burn. It is not pleasant when he does so. And i wonder if it is legal? [sic] Conclusions: No burning or evidence burning had taken place was determined during the site visit. The concern has been assigned to Solid Waste Inspector Grace Halfacre (CON-1607) to be further investigated.								
65156	02/19/2026		SuperMarket Merchandising	Odor	St. Louis /St. Louis City	SLRO	LZ	
Concerned Party: Susan McCormick Concern Info: Susan McCormick called the SLRO office about an strong odor coming from SuperMarket Merchandising. The odor occurs around 6:30 and 3:00 when they open the bay doors for the trucks to come in and out. She describes the odor as nail polish/glue odor. She says the odor is the worst on overcast days and that she could smell it from 2 blocks away. [sic] Conclusions: There was no odor objectionable to me at the time of my visit.								
65157	02/17/2026		Jake Trittler	Open Burning	Warrenton /Warren	SLRO	GH	
Concerned Party: Kevin Gentry Concern Info: We received an open burning concern from the EPA. The CP states: This person has a business picking up junk getting paid and uses a dump trailer and flatbed trailer to haul beds, TVs, hot tubs, furniture, couches, chairs, car and truck tires, and kinds of plastic, all household materials, carpet padding, and everything and anything. He gets paid to remove and he does not take it to a dump, instead he brings it home in his front yard and burns it. There is a pond going down hill from the burn site. We are also on well water and I am worried about water contamination and when he burns it smells really bad and plastic materials fall from the sky and sticks to everything. Takes a power washer to remove. The burn pile has been burnt several times and continues to grow about 20 feet tall and then he burns and this repeats over and over. Worried about getting cancer from this getting to the ground water and in the air we breathe. [sic] Conclusions: No violations were noted during my site visit.

65158	02/20/2026		Earnest Kleier	Open Burning	Festus /Jefferson	SLRO	PT	
Concerned Party: Anonymous Concern Info: MSC 2/20/2026: Party wished to remain anonymous but wished to leave a contact number. I explained that this would be visible on the concern form. The CP called in regard to open burning conducted by Earnest Kleier (SoC), at 1521 US-61, Festus MO 63028. The SoC was stated to be burning treated wood, painted wood, & unknown items in trash bags that are expected to originate off site, as this is not the SoC's primary residence nor are there any people living in the home. This occurred 2/19/2026 and the smell was stated to be awful. The burning is taking place in a burn barrel that has been moved closely to the property line. The CP wished to receive fact sheets on open burning and 10 SR 10-6.045 which I have initiated. This is an ongoing issue that has been investigated three previous times by DNR staff starting in June of 2024 with Hani Hamzeh, and two other instances by Miranda Cason (See attachments). A CA letter has been previously sent as response to this concern. The fire department has responded to calls to this address, including 2/19/2026, however the Cp states that the Fire Department cannot assist citing that the property is out of city limits. [sic] Conclusions: I did not observe open burning or encounter any property occupants at the time of the investigation.								
65159	03/03/2026	03/06/2026	Mark- MerrittAdvanced Metals	Littering Fugitive Particulate Matter	Lamar /Barton	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: Scrap metal including dust, dirt, insulation, carpet fibers, transformer ribbons, trash blowing off property into streets and into residential homes and yards, Also washing off property when rains" from EPA incident report [sic] Conclusions: CON-1737 I did not observe any violations during this investigation. No action is required								
65160	03/03/2026	03/05/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation
Concerned Party: Matthew Newman Concern Info: Continued illegal dumping of waste and human feces for composting purposes, emitting harmful odors causing health issues and violating the federal CCA (clean air act). Water runoff from the property runs directly north into Coon Creek, when in the path of the odor emission, my children(ages 1, 3, 6, and 8) exhibit symptoms of coughing and shortness of breath." quoted from EPA Incident Rep [sic] Conclusions: CON-1742 I did not observe any violations during this investigation. No action is required.								
65162	03/03/2026	03/05/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation
Concerned Party: Katelind Nicholas Concern Info: "On going issues with smell. This property east of town recently sold and since that occurred the smell can be horrible! Closest thing I can think of it to describe it is diarrhea. Please help this small town not die because of this." quoted from the EPA Incident Report [sic] Conclusions: CON-1743 I did not observe any violations during this investigation. No action is required

65164	02/24/2026	02/24/2026	JT Junk Removal	Open Burning Open Dumps	Warrenton /Warren	SLRO	GH	
Concerned Party: Kevin Gentry Concern Info: We received an open burning concern from the DNR Website. The CP states: My neighbor has started a business on facebook called JT Junk removal. He is getting paid to remove all kinds of trash including hot tubs, mattress, couches, chairs, furniture, tires, doors, house hold items he is paid to haul off that should go to a dump. you name it and I have seen it being burnt. He has a big pound down hill not far from his burn stack that is multiple stacks 20 feet high. we are on well water and I am worried about water contamination of well water and the pond. I have pictures to prove all this. Last time he burned my house and cars was covered in plastic chunks that took a power washer 4 times to get the plastics removed. we are on like 3 or more acres of land. I have no issue with the neighbor other than I feel the water and land is going to be toxic waste site if nothing is done. He currently has 2 piles going and 2 trailers full as of 2/24/2026. As the pile has gotten larger it wont be long and he will burn it again. We are afraid to go outside with the burning breathing the chemicals burn and the windows we have are construction grade so it lets the burning odor of rubber and plastice in the house. [sic] Conclusions: No violations of Missouri Solid Waste Law were noted. Concerns 1524, 1646, 1653 all have the same finding								
65165	02/26/2026		Unknown	Odor	/Lincoln	SLRO	GH	
Concerned Party: Gracie Locke Concern Info: We received an odor concern from the I-70/I-270 Odor Complaint Site. The CP states: Started as a strong ammonia smell like someone had dumped chemicals outside our house. Then started to smell like burning brakes on a car. [sic] Conclusions: No violations of Missouri's Odor Regulation 10 CSR 10-6.65 were noted during my site visit.								
65166	02/25/2026	02/26/2026	BMC Stone LLC Defiance Quarry	Fugitive Particulate Matter	Defiance /St. Charles	SLRO	PT	
Concerned Party: Cassandra Ward Concern Info: I received a call from a previous CP. She states that the quarry across the street from her has an increased amount of dust visible from her property. She stated that the dust was contained following her October concern, but in recent months the problem has returned. [sic] Conclusions: We did not observe fugitive dust at the time of investigation, and we reminded the facility representative to continue watering to control fugitive emissions and maintain a complete and accurate watering log to remain in compliance with their construction permit.

65169	02/26/2026	02/27/2026	Lincoln County Egg Farm Rose Acre Farms	Open Burning	Hawk Point /Lincoln	SLRO	CW	Phone Conversation
Concerned Party: Anonymous Concern Info: We received an anonymous open burning concern from the EPA. The CP states: There was originally 10 approximately 40ft x 900ft tin chicken houses on the property. To date 5 of the buildings have been torn down, 2 of which were shredded and burned. Some materials are being hauled away, but the majority are being put behind the buildings where the materials are shredded and burned. Materials that are being shredded/burned include cages, walls, PCV pipes, water lines, galvanized (painted) sheet metal, fiberglass insulation, etc. This burning is also occurring near a river. The smoke causes burning to the nose and back of the throat. Recently the smoke was so thick one could hardly see across the highway. A smokey haze also covered the valley. The burning started about two weeks ago and will likely continue until at least the end of this week. Depends on if the area gets snow/rain. Informant wants to be kept anonymous, and their information not shared outside of EPA. Informant does have pictures available, upon request. [sic] Conclusions: Facility is burning only untreated wood waste. The air curtain incinerator is operating within the parameters outlined in 10 CSR 10 6.045(3)(F). No violations noted.								
65177	02/27/2026	03/02/2026	Dunklin County PWSD 3 South	Bacteria in Water Other Odor	Kennett /Dunklin	SERO	MW	Memo
Concerned Party: Thomas Burris Concern Info: Cp states: He is on the county water district and constantly itches after showering, bathing. He has attempted boiling for cooking. When he boils the water it leaves a thick layer(film like) that will not go away. He has used new and old pans to see if it was something in the pans causing the film, that is not the case. He has purchased water filters for sinks and shower. The water has a serious odor as well. He would like to have this water tested but was told the county runs testing but they have not tested per his request. [sic] Conclusions: SERO's (Michael Wyatt and Deric Calvert) investigated this concern on the morning of March 2, 2026, with the CP's daughter Brittany Estes. Reportedly, the CP was at work and unavailable. Department team members let the water run for approximately 10 minutes at the kitchen sink and no odors or discoloration were observed in the cold or hot water. Ms. Estes showed us a pan that is routinely filled with water and placed on the stovetop to help increase humidity inside the home. The pan did have a build-up of scale inside it due to water hardness. A water sample was collected from the kitchen sink for analysis that later tested SAFE. I left the CP a voicemail message about the safe sample result. No water quality concerns were noted during the investigation and the bacteriological water sample collected tested SAFE. No further action required.

65197	03/05/2026	03/05/2026	Shan, LLC BP	Odor	Kansas City /Clay	KCRO	MC	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 10:08 am Thursday, March 5, 2026 - Date of Incident or First Noticed: 03/01/2025 For the past year when it rains, snows, or gets humid we begin to smell gasoline in our home. We have made several reports to the city and each time they have came out to check the sewer lines and deodorize them. Last night the KCFD was at our house because the odor was so strong our neighbor believed it was a gas leak. We are concerned the gas station across the street from our neighborhood has gas pumps that are leaking. It is the BP gas station at 4621 NE Vivion Road, Kansas City, 64119. [sic] Conclusions: Underground storage tanks (remediation ID R9944) and environmental emergency response (incident ID 260305-1724-MPJ) are aware of the issue. This information was provided to both groups for appropriate follow up.								
65211	03/05/2026	03/05/2026	Former Cornerstone Baptist Church	Asbestos Particulates	Lawson /Clinton	KCRO	MC	Other
Concerned Party: Anonymous Concern Info: The demolition of the Unit Christian and Presbyterian Church began a couple of weeks ago and halted. Now the demolition of the church has resumed today, March 5, 2026. The concerned party stated there were debris and particulates in the air from the demolition. The concerned party is worried about the debris and particulates, and if there has been an asbestos inspection. [sic] Conclusions: Concern had previously been reported to the department on 02/17/2026. A site visit was conducted 02/18/2026. As a result of the previous investigation, department found responsible parties had not inspected for asbestos or notified the department of the demolition. A report documenting violations has been issued. Responsible parties subsequently had the remaining debris inspected, and asbestos-containing material was disposed of as regulated asbestos containing materials. Cleanup supervised by Titan Environmental Services.								
65212	03/05/2026	03/09/2026	Darryl and Tammy Baker	Open Burning	Louisburg /Dallas	SWRO	BS	NOV
Concerned Party: Anonymous Concern Info: Burning of ongoing garage sale materials. Property has been for sale. Property is reported to have been sold to Josh Ford. Current property owner/seller is cleaning up years worth of garage sale materials. This site has been reported for burning in the past. [sic] Conclusions: CON-1784 Improper disposal of tires through burning is in violation of 10 CSR 10-6.045 Open Burning Requirements and Missouri Solid Wate Law and Regulations Section 260.210 RSMo. A notice of violation was issued with response required with proof of disposal. An acknowledgement of violation was received during site visit.

65213	03/05/2026	03/09/2026	City of Branson	Open Burning	Branson /Taney	SWRO	BS	Email
Concerned Party: Keith Clements Concern Info: Neighbor is clearing land, cutting trees into large piles and burning them. This has been going on for about a week, caller has talked with the city and fire department. The smoke is causing caller to have breathing issues and his car has been covered in ash. Also nearby homes are covered in ash as well. [sic] Conclusions: CON-1788 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required.								
65216	03/05/2026	03/09/2026	Brian Padilla	Open Burning	Merriam Woods /Taney	SWRO	BS	Site Visit
Concerned Party: Rebecca Reich Concern Info: Neighbor is doing construction work next door to caller. They are putting trash in piles and burning them, they are also diverting their rain water onto caller's property. The burn piles are large and filled with trash, caller noticed styrofoam, trash bags, and various construction materials in the piles. They burn the piles every two weeks or so and they often produce dark black smoke. Recently noticed they have put concrete slabs in their culverts, which is diverting rain water onto caller's property. The rain water is filled with ash from the fires [sic] Conclusions: CON-1797 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required.								
65217	03/06/2026	03/06/2026	Springfield Treatment Plant, West Bypass	Odor	Springfield /Greene	SWRO	BD	Phone Conversation
Concerned Party: Anonymous Concern Info: Caller states that the Springfield SW Treatment Plant around West Bypass is smelling horrible this morning. She said it smells like blood and poop. Caller states that the facility has been smelling for some time and seems to be the worse on heavy air days or evenings. RP gave the address and phone number to the facility. She drives west bypass twice a day, five days a week and the smell seems to be worse near the rock cut on James River and west bypass. [sic] Conclusions: CON-1801 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors were observed during the site investigation. This is a major wastewater treatment plant and will experience transient odors following heavy rain events, but odors were gone by the time the investigation took place.

Concerned Party: Jesse Hill Concern Info: Via Webform email - Submitted at 4:58 pm Thursday, March 5, 2026 - Date of Incident of First Noticed: 03/05/2026 Hello, I live next to a person who rents out ~12 homes. I believe he collects the trash from his tenants including tires and other hazardous materials and burns them in his back yard. Today he burned a significant amount of material that created thick black smoke that caused my eyes to water and my throat to itch. The Fire Protection district sent out a pumper and several other trucks to address the fire. After speaking with the Assistant Chief I was told that the district had no authority to issue fines. I was also told that the county would not respond to the issue. My neighbors and I were directed to file complaints with the Missouri Department of Natural Resources and to continue calling the Fire Protection District when they were burning. Here are the other dates I observed what I believe to be the burning of hazardous waste: 1/2/26, 1/5/26, 1/22/26, 1/29/26, 2/15/26, and today 3/5/26. I have spoken with the owner. I assumed he was unable to afford trash service so I paid him \$50 to cover the starting fee to set up trash pick up. He did not set up trash pickup. I spoke with him again and asked if he would use a trash disposal service if I went and picked up the trash can and paid the start up fee and the monthly service charge. He agreed. After a few weeks passed he decided to resume burning while trash was being picked up from his home. I then canceled the trash service and encouraged him to keep the service as he owns several properties that generate ample income. He did not. [sic] Conclusions: On the tire fire side of the concern, the air unit issued/had him sign a violation of acknowledgement and received the open burning regulations. On the solid waste side of the concern, the how to manage household waste fact sheet was given to Ferguson and the invoice receipts from the Sibley transfer station supports his side of the story.								
65223	03/05/2026	03/10/2026	Brett Ferguson	Open Burning	Buckner /Jackson	KCRO	CK	Phone Conversation RTC, UF
Concerned Party: Jesse Hill Concern Info: Once a month, neighbor at 31806 East Sundown Valley Road just outside of Buckner burns trash and tires. On March 5, 2026, responsible party brought in a large load of tires and began burning them. Neighbors were concerned about the size of the fire and fumes being put off from the burning tires. [sic] Conclusions: Documentation provided by the local fire department states Brett Ferguson burned a tire, which is a violation of Missouri's open burning regulations. No evidence was found to indicate Ferguson is burning waste from his rental properties. Ferguson was provided regulatory information, and he agreed to comply. A report with Unsatisfactory Findings will be issued.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65236	03/03/2026	03/05/2026	Timber Ridge Landfill/ Beelman Trucking	Other	Richwoods /Washington	SERO	BC	Phone Conversation
Concerned Party: Steven Rudolph Concern Info: Cp states: The EP is conducting a ash clean out-hauling to Timber Ridge landfill. The concern is that up to 45 trucks an hour(80 yard dumps) are damaging and covering the roads and nearby area with black debris and the air is covered with it as well. CPs dog had a reaction this and it caused loss of vision. Several residents have complained about the debris and air quality since this began. [sic] Conclusions: On March 3, 2026, I spoke with the concerned party to gather more information about the concern submitted. Mr. Rudolph stated that his main concern was the coal ash blowing from the trucks going to and from the landfill as well as the track out on H highway. He stated that the blowing coal ash has caused some air quality issues. I informed him I would investigate the concern and let him know what the outcome was. On March 5, 2026, I traveled to Timber Ridge Landfill. Before arriving at the landfill, I traveled H Highway to and east and west of the landfill to observe any track out issues that could be occurring. I did not observe track out of coal ash being an issue while on site for my investigation. I then pulled into the landfill parking area and called Kevin Gentry- landfill operator. Mr. Gentry stated he would return to the landfill in approximately 15 minutes. While waiting, I observed landfill traffic that included Beelman Trucking vehicles coming in and out of the landfill. I observed six Beelman trucks delivering coal ash to the landfill. Five of the six trucks had their tarps in place when they entered the scale. One truck did have their tarp rolled back when entering the scale. I did not observe any caking on the undercarriage of the vehicles while entering or exiting the landfill. When Mr. Gentry arrived at the landfill, we drove to the active face of the coal ash to observe conditions. The area was experiencing wet weather at the time of my investigation. I did not observe any coal ash blowing from the landfill or the Beelman trucks while on site. Mr. Gentry stated that since the previous inspection on February 13, 2026, the landfill had added 10 loads of rock to the hauling roads to keep track out issues down. He also stated that during dry weather the landfill is continuing to water the coal ash to prevent blowing problems. Mr. Gentry also stated that landfill personnel were running the sweeping equipment on State Highway H. I encouraged Mr. Gentry to begin documenting this on his daily logs. I thanked him for his time and left the facility. On March 6, 2026, I spoke with Alex Cortez, Beelman Trucking route representative. I explained to Mr. Cortez the reason for calling was a concern received by the department. I explained to him the nature of the concern and the outcome of my investigation. I encouraged Mr. Cortez to remind his drivers to keep their tarps covering their loads until they reach the top of the landfill to dump the coal ash. This would prevent any issues with blowing from their vehicles. Mr. Cortez stated he would speak with the drivers. On March 6, 2026, I called the concerned party to update them on the outcome of the investigation. I left a voicemail with Mr. Rudolph. No violations were observed at the time of the investigation. I provided recommendations to the landfill and trucking company to prevent further concerns.								
65249	02/11/2026	02/27/2026	Jason Schlotter	Open Dumps	Holts Summit /Callaway	NERO	NG	Report UF
Concerned Party: Anonymous Concern Info: I was stopped by an individual while conducting another investigation. The individual stated that they wanted to remain anonymous but would like to file an environmental concern on the property to the west of 3549 County Road 4006, Holts Summit, Missouri 65043. This individual stated that the property had various waste and debris piled on it. [sic] Conclusions: Based upon observations and information obtained during the investigation, it was determined that Jason Schlotter is in non-compliance with the Missouri Solid Waste Management Law and Regulations and the Missouri Air Conservation Commission Regulations. UF issued on 3/24/2026								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65250	03/06/2026	03/12/2026	Travis Lake	Asbestos Open Burning	Neosho /Newton	SWRO	JW	Other
Concerned Party: Anonymous Concern Info: *Webform* I wish to report an illegal dumping and demolition being done by Signature Dirt Works of Neosho. They are tearing down and have in the past burned asbestos laden material and other hazardous materials with no permit, permission, or regards to the environment and including their employees well being. I was one of those employees who was exposed to potentially hazardous elements. [sic] Conclusions: CON-1816 The violation actions will be tracked under concern #1846 since there was not enough information in this concern to determine the source of concern until March 12, 2026. During the investigation I observed evidence of a partial demolition of a commercial building without an asbestos inspection nor notification to the department. This is a violation of 10 CSR 10-6.080 "Emission Standards for Hazardous Air Pollutants." A third violation for Solid Waste Management Law 260.210 RSMo will be issued for the existing demolition waste on site. Required actions include proper disposal of all demolition waste, an asbestos inspection, and notification to the department before demolition continues. These violations and the corrective actions are documented in a Letter of Warning sent on March 24, 2026.								
65252	02/26/2026	03/05/2026	The Catfish Place	Open Dumps Open Burning	Arbela /Scotland	NERO	NG	Report UF
Concerned Party: Anonymous Concern Info: Caller stated that a restaurant called "The Catfish Place" in Arbela, Missouri, has had no dumpster of any kind for at least ten years. The caller stated that the restaurant instead has a pickup truck that they use to haul all restaurant waste including food waste and trash, directly across Hwy 136 to another property they own and that they then dump and burn the waste in a wooded area behind the lake dam. [sic] Conclusions: Based upon observations and information obtained during the investigation, it was determined that Mark Mattingly is in non-compliance with the Missouri Solid Waste Management Law and Regulations and the Missouri Air Conservation Commission Regulations. A Report of Unsatisfactory Findings was mailed on April 3, 2026.								
65259	02/22/2026		Daniel Hager	Open Dumps	Wellsville /Montgomery	SLRO	GH	
Concerned Party: Anonymous Concern Info: Sent in on webform:"would like to report neighbor for bringing home debris from business Celestial Beauty and Hager Tree Care and putting it in a large dump in his back yard to burn. Due to winds we now have trash all over neighborhood. I reported this a few days ago and have not noticed any changes. Looks like cardboard, cabinets, furniture, trees, and particle board etc from businesses. I thought it was not legal to bring his debris in to his home place from his businesses to burn, but he does this all the time. Its a mess and blows all over neighborhood along with cant be good for lungs or animals around the area. " Please provide driving directions from the nearest town and road intersection to the location of the activity causing concern. FROM WELLSVILLE MO TO 78 SOMMER ROAD!!!!!! [sic] Conclusions: Sent a letter to the responsible party requiring cleanup. For more information please view letter.								
65261	03/09/2026	03/11/2026	Archie RV Park	Odor	Archie /Cass	KCRO	TC	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 5:25 pm Friday, March 6, 2026 - Date of Incident of First Noticed: 01/01/2026 There is an RV park in Archie that smells of raw sewage and natural gas. Sometimes it smells like rotten eggs and smoke. The smell is strong enough to linger for a mile or 2 away from the RV park. It is strong enough to smell through closed windows of a moving car from the highway. [sic] Conclusions: No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission were observed.

65298	03/10/2026	03/10/2026	APAC and Mid-States	Other	Bates City /Lafayette	KCRO	JS	Other
Concerned Party: Anonymous Concern Info: Via Webform email - (2) received - Submitted at 7:46 am Tuesday, March 10, 2026, Submitted at 8:18 am Tuesday, March 10, 2026 Date of Incident or First Noticed: 03/09/2026 There appears to be an environmental issue with limestone dust in our wooded community. This morning you could smell it in the air like it hovered over us contained within the dense fog. It seemed like old damp concrete. There are air quality monitors that confirm some air quality degradation issue. The IQAir monitor less than a mile away from the large quarries reads 62 for AQI at 7 am CST today and elevated for several hours already. This is more than anywhere in Kansas City according to other IQAir readings. Here are other readings: Lee's Summit- 52, Grain Valley (close to us)-20, Troost (KC)-57, Front Street (KC Industrial District)-56. This happens quite often and our area is residential, low population of around 4,000 with a lot of woods. It has to be those large quarries. Our area has over 800 acres of woods (Oak Grove/ Bates City) with lots of oak trees and wildlife. It seems inhumane to the animals, if nothing else. Hope this can be checked out since they seem to be not containing the dust very well. [sic] Conclusions: The Mid-States Materials Bates City Quarry appears to still be undergoing construction and has not started operation yet. The APAC quarry appears to be currently closed down as it has changed ownership. Air quality in the immediate area seems consistent with regional air quality.								
65302	03/10/2026	03/20/2026	Stahl Specialty Company	Odor	Warrensburg /Johnson	KCRO	JS	Phone Conversation
Concerned Party: Emma Perkins Concern Info: Via Webform email - Submitted at 8:52 am Tuesday, March 10, 2026 - Date of Incident or First Noticed: 03/01/2026 Smells like metal and hot when the wind blows from the direction of Stahls into my neighborhood. I have always heard people talk about how it smells strongly of metal in the neighborhood to the North of Stahls but recently moved there and immediately notice the smell. It was especially strong this morning (March 10th) likely due to the direct wind direction from Stahls to my home. [sic] Conclusions: While an odor was detected during the investigation, it was only detected at a 2:1 dilution and did not constitute a violation of the odor regulation. No violations were observed during the investigation.								
65308	03/11/2026	03/12/2026	Powell Milling and Live Hauling	Odor Particulates	Aurora /Lawrence	SWRO	BD	Site Visit
Concerned Party: Zoe Willis Concern Info: The concerned party reported an odor concern. Last night the odor filled her house between 11:30 PM and 5:30 AM. Caller stated it caused nose bleeds. The odors are prevalent daily, but especially at night. She thought maybe the operator at night may not know how to keep the odors down. The odors have a strong chemical smell, and sometimes the material dust can be seen in the air like a sandstorm. The dust and odors are coming from where material is being transferred between two silos and railcars. The concerned party lives north of the facility and smells the odors when the wind is out of the south, but she also works in town at Byron E. Taylor Christian Service Center (Thrift Store), and could smell the odors while we were talking on the phone. The concerned party works 8:00 to 1:30 Monday through Friday at the thrift store and said the investigator could smell the odors from the store parking lot. She can be contacted by cell phone or at the store if needed. A search of the Lawrence County GIS shows Powell Milling and Live Hauling is the owner of the source of concern property. I searched the Secretary of State Business Search website and was not able to find contact information for Powell Milling and Live Hauling. [sic] Conclusions: CON-1869 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors was observed. No odors were leaving the site at the time of the investigation, and the concerned party could not be reached for follow up.								
65309	03/10/2026	03/10/2026	Kaci and Willy Garland	Other	Unionville /Putnam	NERO	DB	Phone Conversation
Concerned Party: Anonymous Concern Info: Online report 75951 states: "Demolition of a home that contains shingles, blow in insulation, and other materials that could create an environmental hazard. Demolition started 3/10/26. No notification on MO DNR website" [sic] Conclusions: No violation alleged. Single-family residence exempt from asbestos regulations. Discussed with contractor, this is the only structure in this project.

65315	02/27/2026	03/04/2026	Unknown	Open Burning	Foley /Lincoln	SLRO	LZ	
Concerned Party: Charles Hobby Concern Info: CP wanted to report an instance of tires being burned at the property of 902 Pet Street in Foley, MO. The burn occurred in the early morning of February 17, 2026. The burn led to a propane explosion that the local Winfield-Foley fire department responded to. The fire department documented and took pictures of the event. Investigator should get in touch with the fire chief Arron Lee. Might have enough evidence to go off of w/o a site visit. The fire department's phone number is 636-566-8406, and the case number for the event is WFM-2026-6-00103. Driving Directions From Hwy 79, once you get in Foley take a right on Hancock St., then Pet St. will be the second road left. [sic] Conclusions: Based on the incident report, we determine this is a violation of state regulation 10CSR 10-6.045, "Open burning Regulation". For further information see the LOW was issued from this office								
65322	03/05/2026	03/06/2026	GM Motors	Odor	Wentzville /St. Charles	SLRO	PT	
Concerned Party: Gina Concern Info: We received an odor concern from the EPA. The CP states: The informant works down the road from the plant and indicated that very strong paint odors come from the plant with frequency. Most recent was on 3/2/26. When these odors occur, the informant indicated their lungs and eyes hurt. [sic] Conclusions: I did not observe a violation of the odor rule at the time of the investigation.

65350	03/12/2026	03/13/2026	C&L Grease (Larry Wald)	Odor	Carterville /Jasper	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: I listed todays date only because it's been going on for SO LONG I can't remember the date we first noticed! YEARS. Please come back and address this issue again... you've been here and you know how bad it was. It is just as bad again... it was reduced by 90% after you addressed it with them, now they think they can go right back to their old ways and nothing will be done. We are miserable again here in Carterville... and you are literally our only help unless we decide on a civil suit. I can get my company involved but I don't want to... I would rather you step in and address this with regular follow ups to ensure they are abiding by your rules. I'm even willing to purchase an olfactometer and keep records for you if that is what it takes. I will record everything and document how often this is happening. I have nothing else against these people (they are actually related to me by marriage) But I work in this area and it's not fair to me or my coworkers to be forced to sit and smell the rotten feces smell all day 5 days a week! I wear a mask (INSIDE), burn scented wax, I have scented material attached to all the return air vents, glade plug in's everywhere, and I still can't keep it out. I should not have to do all of these things... and I certainly should not have to leave work just because they refuse remain within the regulations set forth by your agency. Please come address this issue again... please. And make sure you're down wind. These poor people that live here. [sic] Conclusions: CON-1894 I did not observe any violations during this investigation. No action is required.

65351	03/12/2026	03/18/2026	Advanced Metals	Open Dumps	Lamar /Barton	SWRO	JR	Phone Conversation
Concerned Party: Anonymous Concern Info: There is an illegal dump site in the area of interstate 49 and the Bellamy Missouri exit. Due to previous threats either by or allowed by the company, the owner and/or current employees my information on this site is limited. The same trash material(shredder scrap) that is at both locations in Lamar was being taken and dumped in a field in the area of I49/ Bellamy exit. The material consists of plastic, trash, glass, carpet, insulation, tires, rubber, and extra fine dust of all the materials ground up along with oversize material that wasnt processed. Dumping was happening around November of 2025. I can estimate anywhere from 30 to possibly up to 100 semi truck loads were dumped here. [sic] Conclusions: CON-1900 MoDNR's enforcement staff will be made aware of the site visit. No changes at the property were observed.

Concerned Party: Carl Concern Info: Caller reports that odors from Bluebird are very bad today (Friday 2/27) and causing sore throat. Odors are extremely intense, no apparent schedule for odor intensity, sometimes it is 9pm or the middle of the day. Other times it just smells but not this bad. They seem to have construction going on currently. [sic] Conclusions: At site, found no significant odors offsite. Winds were blowing away from roads, so I was unable to get a good nearby location downwind. Conditions were 56F, winds ENE 5 mph, 80% humidity, overcast. Receptionist at Bluebird office stated they turn the piles every day and she wasn't aware of any particular event that would cause stronger odors those days.								
65364	02/26/2026	03/03/2026	Capital Quarries Stadium Quarry	Fugitive Particulate Matter	Jefferson City /Cole	NERO	DB	Site Visit
Concerned Party: Bill Concern Info: Caller reports that the Capital Quarries site between W Edgewood Drive and Sam's Club off 179 never uses dust suppression and operates 24/7 recently, causing dust to be like a fog in the area including nearby residential areas. [sic] Conclusions: At site, I observed no visible emissions. The rock and roads were wet from recent rain. I discussed with Chris Thiltgen at the concrete plant office at the site and he said they are currently running double shifts because they are behind schedule due to equipment breakage. He informed me they shot rock Monday and Friday that week and I noted the concern was dated Thursday. He stated that when conditions allow (no freeze or rain), they run the water truck constantly during plant operations, pausing it only to refill the tank.								
65383	02/21/2026	02/23/2026	Jessica and Wayne Messex	Other	Willow Springs /Texas	SERO	TT	Letter
Concerned Party: Anonymous Concern Info: Received via email CP states: Dead animals, trash all over, building to close to road I can't get threw without going off in woods, burning plastic stuff, 16 dogs some runs loss tries to bit us in our yard. [sic] Conclusions: Bobbie Clark left a message for Texas Co. Commissioner on February 21, 2026 at 417-967-3222 to pass along the report of the building being in the right of way. No return call was received by the department. On February 23, 2026, Lyndsey Rightnowar and I visited the property on 17412 Freedom Rd in Willow Springs. While on site we spoke with a gentleman that was living on the property but was not the property owner. He stated that Jessica and Wayne Messex were the owners, although Amanda White is listed as the owner on Missouri Parcel Viewer. Jessica and Wayne Messex were not at home at the time of our visit and we were unable to contact the property owner to receive permission to adequately view materials on the property. Residential litter was identified on the property during the investigation; however, no visible litter was identified leaving the property nor open burning. Publications on managing residential waste (PUB2070) and open burning (PUB2047) were left on site along with department contact information.

This operation has ruined our air quality and the general enjoyment of our properties. Our vehicles smell so bad everyday we can't even park in our garages. [sic] Conclusions:								
65398	03/13/2026	03/17/2026	Unknown	Odor	Springfield /Greene	SWRO	JW	Site Visit
Concerned Party: Anonymous Concern Info: Caller states a strong sent of chlorine on W Poplar Street has been identified. Is strongest around midway when the weather is nice. The area is surrounded by multiple business, so unsure where the smell is coming from, but many businesses in the area. Maaco Autobody shop recently had a fire, but the smell was observed to occur before and after. Caller has tried contacting multiple sources to figure out the source of the odor including Recycling Center, sewage, and city utilities services. [sic] Conclusions: CON-1913 I did not observe any violations during this investigation. No action is required.								
65409	03/12/2026	03/16/2026	I-49 RV Park	Minor Wastewater Facility Odor	Archie /Cass	KCRO	TC	Other
Concerned Party: Ashley Concern Info: Since the addition to the RV park was completed a putrid smell of sewage that intensifies wit hrain, heat, humidity. There appears to be sewage dumped and runoff carried by the rain into the Grand river. I have spoken to the city several times to no avail. I keep getting told it has always been like that and it's normal. I've lived in Archie since 2009, prior to the RV park being built and I know for a fact there was never an odor. Alleged Violator's Latitude/Longitude: 38.486124 / -94.342909 Alleged Violator's FRS ID: 110056412626 [sic] Conclusions: No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission were observed.								
65420	03/03/2026	03/06/2026	Jared & Mandy Yates	Other	Bonne Terre /St. Francois	SERO	BG	Email
Concerned Party: Anonymous Concern Info: Mandy & Jared Yates burn garbage and any waste on property weekly. Today's burning had major amounts of white and grey with a hints of black floating downstream in the air for over 3 hours. They do not have a trash pick up service so this is a reoccurring problem for the air quality constantly. All the nearby neighbors agree this is concerning but no one wants to address directly with them due to they are uncertain the responses they will get from the Yates. They have burned area in the backyard due to all the burning. The property is 8 miles east of Bonne Terre (Hillsboro Road off Hwy K) [sic] Conclusions: On March 6, 2026, I arrived at the property to conduct an investigation. I was unable to contact anyone on the property. I left fact sheets, Facts on Open Burning Under Missouri Regulations - PUB2047 and Managing Residential Waste - PUB2070, and contact information with a request to call me. I was able to observe a burn pile from the driveway, but it appeared to contain residential waste. I was not able to see any durable goods or other items that cannot be burned in the pile. On March 9, 2026, I received an email from the Yates Family stating that only their residential waste is burned. Waste that cannot be burned is picked up by other individuals or reused throughout the property.

65423	02/18/2026	02/20/2026	Flickerwood Farms	Other	Jadwin /Cape Girardeau	SERO	BG	Letter
Concerned Party: Christine Jones Concern Info: Received by email. CP States: This is just down FF in Fruitland. Was last week early(Monday I believe). No chemical smell that day but that dirty cloud is notable!! Looked like Los Angeles early morning. Was on my way to pick completed taxes up and caught pics. Around Flickerwoud area.?? Also, had to get a document notarized and lady at bank notes her kids always commenting on sewage smell on outer road. I did call the fire dept. recently but they didn't let me know anything. Thanks, Christine Jones [sic] Conclusions: Please see Unsatisfactory Findings issued March 10, 2026 for findings.								
65424	03/05/2026	03/11/2026	Scrap Mart Jonesburg	Open Burning	Jonesburg /Montgomery	SLRO	GH	
Concerned Party: Anonymous Concern Info: We received an anonymous environmental concern from the DNR website. The CP states: Scrap Mart Jonesburg. I am a previous employee of Scrap Mart. The amount of air pollution coming from that facility and their belt was unbelievable to me considering how close they are to town. The air pollution and fires were the most visibly noticeable problem to the township. The water run off and pollution to the soil and any local drinking supply is likely causing devastating health problems. As an employee they had zero removal of contaminants processes before destruction of materials, forcing the workers to inhale it all within moments of the breakdown of materials. This allows no time for the air to clear or materials to drop in temperature causing workers to burn themselves daily even with more than the recommended 'ppe'. The fire extinguish process was also alarmingly slow. They told the employees to leave small fires and only report larger fires to the dedicated fire hose employee and the rest to ignore the flame. Bitterness from being removed as an employee and also being gas lit as to why I was fired has led to to writing this complaint only second to concern for the town of Jonesburg. [sic] Conclusions: No violations of Missouri Open Burning Requirements 10 CSR 10-6.045 were observed								
65425	02/11/2026	02/25/2026	Courtney Waterman	Open Dumps Open Burning	Joplin /Jasper	SWRO	GE	Report NOV
Concerned Party: Carl Junction Fire District Chief Joe Perkins Concern Info: Illegal tire fire @ an illegal dumping site. This site is a historical site previously investigated and properly remediated. It is now active again. [sic] Conclusions: CON-1465 Open burning violation and illegal disposal of solid waste.								
65429	03/05/2026	03/06/2026	AHF Flooring Inc.	Other	West Plains /Howell	SERO	HC	Phone Conversation
Concerned Party: Emily Grisham Concern Info: I arrived on site and began a method 9 reading at 11:30 on March 6, 2026. I made observations for 30 minutes without a reading over 15%, there is a gap in recording on the method 9 sheet due to a telephone conversation with a responsible party for another concern. During this time there were no opacities noted that would cause concern. I did not make contact with the facility due to a findings of compliance being issued for an inspection conducted on February 24, 2026. During the inspection Method 9 records were observed and facility personnel explained the facility process in depth as regards to method 9. observation and opacity. On Friday March 13, 2026, I attempted to contact the concerned party and left a voicemail. At this time I have not received a return call. On March 17, 2026, Jesse Evans, Environmental Supervisor, contact the facility to inform them of the concern received. The method 9 conducted was discussed as well as general operations. [sic] Conclusions: No opacity issues were noted at the time of the investigation.

65431	03/03/2026	03/11/2026	Richard Mennemeyer	Open Burning	Troy /Lincoln	SLRO	MC	
Concerned Party: Anonymous Concern Info: Neighbor owns a construction business and is burning vinyl siding and other construction waste. Burns at least once a week and sometimes more. He burns during the day. It's in the back yard but you should be able to see from the driveway. [sic] Conclusions: No violations were witnessed during the investigation.								
65432	03/11/2026	03/11/2026	Brockmiller Construction	Other	Park Hills /St. Francois	SERO	HC	Email
Concerned Party: Anonymous Concern Info: Received by email. CP States: Brockmiller Construction is conducting asbestos abatement at Mineral Area College's Park Hills campus. The construction workers are not wearing proper PPE, and are not taking proper measures to prevent the asbestos from entering the HVAC system, possibly exposing construction workers, faculty and staff, and students to asbestos. [sic] Conclusions: On March 11, 2026, Bailey Gargac, Environmental Specialist, spoke with Tate Lietzau-Mourer, Project Manager, via phone call. It was stated that the asbestos present was nonfriable from the glue on floor tile. Per documentation provided, the abatement was done by Midwest Environmental Studies on March 7th and 9th of 2026 and the waste was taken to Lemons Landfill. On March 13, 2026, Hayden Cassinger spoke with Tate Lietzau-Mourer to ensure that no addition projects had been started which could disturb asbestos. Tate stated there had been no additional projects started which could disturb asbestos. Has stated that all known asbestos had been removed, no other projects will be involving asbestos. On March 16, 2026 Tate reached out asking for an email for both himself and Mineral Area College President, Dr. Joseph Gilgour. On March 17, 2026 I sent both an email confirming no issues were noted during the investigation.								
65435	03/06/2026	03/09/2026	Unknown	Odor	St. Louis /St. Louis City	SLRO	CW	Phone Conversation
Concerned Party: Randi Jones Concern Info: We received an odor concern from the I-70/I-270 Area Online Form. The CP is experiencing a strong petrochemical, solvent, or chemical odor. The CP states: It is so strong that I can hardly breathe. It is horrendous and it's been going on for multiple days now and it's absolutely unacceptable! The CP believes the odor is originating from the factories in Sauget, Illinois. [sic] Conclusions: 09MAR2026-CJW- I ran the odor loop, starting at 11:46 for the first reading and ending at 12:34 for the final reading. I noticed an asphalt odor at two locations, Sothern Metal Recycling and JD Streett, but they were not at violation levels. Likely this odor was due to road work in the area. Conclusions No violation noted. Odor loop results logged in Air Unit spreadsheet.								
65436	03/06/2026	03/06/2026	JW Strack	Other	Farmington /St. Francois	SERO	BG	Phone Conversation
Concerned Party: Anonymous Concern Info: Concerned party stated that at the former Mineral Area Hospital they are demolishing the building and pushing it in a hole. The individual believes the building contains asbestos. They stated that remediation costs were also prohibited for the site. It was stated that the building has been closed approximately 5 years. [sic] Conclusions: On March 6, 2026, I conducted a drive by of the site. There was no one present at the time of investigation. The building was partially demolished with debris piles around the property. There was also a pile of dirt and what appeared to be some dirt work on the edge of the property. I did not see any signs that debris was being buried. I then spoke with Mr. Strack on the phone. There is a hole in the dirt work, but that was started by the demolition contractor that was working on this project prior to him. Mr. Strack has not started working at this site. The demolition notification amendment for him to take over as the contract was sent to the Asbestos Unit today. They plan to use clean fill to fill in the hole, but do not plan to bury any of the demolition debris. They plan to utilize Pea Ridge landfill for most of the debris and the asbestos containing material will be placed in Republic roll off dumpsters.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65446	02/23/2026	02/27/2026	GSB Services	Other	Sikeston /Scott	SERO	HC	Phone Conversation
Concerned Party: Dylan Heaton Concern Info: rec'd via email - forwarded from EPA Region 7 - cp states: Person is burning various hazardous materials, contaminating the land and air in a residential area. Smoke and odor can be heavily detected outdoors, and it still causes a smell of smoke when indoors, making it difficult to breathe at times. this person also has junk scattered across his entire yard, some of which is causing neighborhood problems with pests and bugs. Many items are not stored properly, and are fully7 exposed to outside elements. [sic] Conclusions: On February 27, 2026, around 10:15 a.m. I arrived at 8 Hale road in Sikeston. I was met by Faith Bates, I explained the meaning of the visit and the nature of the concern received by the department. I provided Faith with a copy of "Facts on Open Burning under Missouri Regulations - PUB 2047", "10 CSR 10-6.045 Open Burning Requirements", "Illegal Disposal of Construction and Demolition Wastes - PUB-2251" and "Managing Construction and Demolition Waste - PUB2045." I explained some aspects of waste disposal and open burning requirements. Faith explained the items on site come from home liquidation , her and her husband Dean sell the valuable material and items. faith stated that waste from the process is transported to a gentleman in East Prairie for disposal. On March 3, 2026, I spoke with the concerned party (CP) via telephone to better understand the situations and the relationship between the responsible party (RP). The CP reiterated the concern submitted, I explained some aspects of solid waste regulations and what can and can't be burned at a resident. Later I called the RP, but was unable to make contact. I left a voicemail and explained open burning regulations and some aspects of solid waste regulations and implored him to call me back.								
65448	02/24/2026	03/03/2026	David Zarn	Open Burning Open Dumps Used Oil	California /Moniteau	NERO	DB	Report UF
Concerned Party: Darin Volkart Concern Info: Online report states: "58807 redbud road, California MO 65018 These individuals have been stripping down cars etc and creating a huge mess. Oil/gas spots on ground. They have a pit they are throwing refrigerant bottles. They frequently burn trash creating large amounts of black smoke and terrible smells. Neighbors frequently complain about the smell. They also let there trash blow on to neighboring properties" [sic] Conclusions: Violation of open burning rule found during the investigation, issuing UF. Observed burning tire, noted significant other burned material including furniture, appliances, and household waste. Resident stated most of the burned material was from an accidental fire in a trailer and shed two years ago and he also burns household waste, but not salvage. I observed an active burn pile containing brush, a cooler, 5-gallon bucket, a tire, and other assorted junk.								
65498	03/12/2026	03/12/2026	APAC Quarry and Mid-States Materials	Particulates	Bates City /Lafayette	KCRO	JS	Other
Concerned Party: Anonymous Concern Info: Discharge of fugitive limestone dust with other possible contaminates from industrial quarry properties into air surrounding their property. This goes onto residential homes (in which mostly senior citizens reside) and woodlands with oaks, wildlife, etc. The AQI is higher than most of KC now and quite often ...and we are a small community. There is an IQAir monitor within a mile away and can see KC readings to compare. At 7 am, the reading was 62 at our rural residential area. Front street in Kansas City was 57. Grain Valley next to I-70 had 20 AQI, close to us but much different (better) air. Troost in KC was 57. It is still elevated like KC level at this time (12 noon). This morning there was a dense fog and an odor of concrete at my house close to these quarries (at 5 a.m.). I've seen what appeared to be sick rabbit and squirrel within the last 6 months. The rabbit did not run from my dog. We have lots of ticks due to our woods (1000 acres of oak woods in oak grove area). It is concerning that diseases could affect wildlife to pets to humans from susceptibility from poor air /water and lack of oxygen. We have no factories or heavy traffic. If it affects Oak Grove oaks...that is not good for investments, if nothing else. It makes no sense to have such massive quarrying in our valuable woods of 1000 acres. No one wants it except very few to make money off of our misfortune of having them in our neighborhoods. [sic] Conclusions: The Mid-States Materials Bates City Quarry appears to still be undergoing construction and has not started operation yet. The APAC quarry appears to be currently closed down as it has changed ownership. Air quality in the immediate area seems consistent with regional air quality.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65536	03/09/2026	03/20/2026	David Long	Open Dumps Open Burning	Center /Ralls	NERO	BH	
Concerned Party: Anonymous Concern Info: Webform states: "David Long lives at 15040 Hwy H and has been burning trash and dumping trash on the hill behind the house and in the woods on and around the property. The trash includes plastic, non biodegradable items. There may be tires and other toxic material such as engine oil included. This is harmful to the environment." [sic] Conclusions:								
65580	03/12/2026	03/13/2026	4670 Brennan Woods Dr, High Ridge, MO 63049	Open Burning General Water Quality	High Ridge /Jefferson	SLRO	GH	
Concerned Party: Anonymous Concern Info: MSC 3/12/2026: Caller wished to remain anonymous and had multiple environmental concerns. Primarily the CP states that appliances, trash, totes, and many other misc. items and solid waste is being accumulated and stored on the property. The CP states that there is concern that the residents of this property are contaminating the creek with these items and potentially human waste as it was stated there's no plumbing or trash services at this location. There is also an open burning aspect to this concern, this was last stated to have occurred a month ago where the property residents were burning wires and trash. It was stated that the home has been condemned for roughly a year and people are still living in the home. Other agencies that have been contacted include Jefferson County Housing Authority, Health Department, Fire Department, and Police. The CP States that the police have responded to physical altercations of residents who were stated to be under the influence of drugs. [sic] Conclusions: The concern is being investigated further by the Jefferson County Fire Marshall Bureau to investigate the residential waste burn further. No other media concerns were noted in the investigation.								
65661	02/24/2026	02/27/2026	6K Additive Company	Particulates	Washington /Franklin	SLRO	MC	
Concerned Party: The city of Washington Concern Info: City of Washington (Todd 573 291 5723) called and reported that he observed smoke from a stack at 6k Additive Company located at 703 West Main Street, Washington MO. The company operates a titanium milling operation generating soapy water mist combined with titinium dust emitted through a stack .The facility operation is regulated by Washington City. The city wanted to know if air permit is needed for this kind of operation. The caller said that the facility has been operating at this location for several years. The caller asked to be contacted at the time of the visit. [sic] Conclusions: No violations were determined during the investigation. 6k additives likely is not required to have a permit with the department regarding air pollution. The concerned party will reach out if operations change or if there are new findings.								
65663	03/11/2026	03/12/2026	Eagle Lanes & Fun Zone	Asbestos	Sullivan /Franklin	SLRO	MC	
Concerned Party: Anonymous Concern Info: We received two identical asbestos concerns from the DNR website. The CP states: Drove by and noticed Asbestos tiles being removed no respiratory protection and bags don't have asbestos markings and tiles are all broken. I have been through the asbestos class [sic] Conclusions: No violations were determined during the investigation. Sunbelt Environmental, the asbestos contractor will send the landfill manifests when they become available. Notification number(s) for reference: D13047-2026
